

# Introduction to Alphabot ATmega328P Robotics Research Platform

e-Yantra Team

Embedded Real-Time Systems (ERTS) Lab  
Indian Institute of Technology, Bombay

# Agenda for Discussion

- 1 Introduction to Robotics
  - Major Components of a Robot
- 2 Alphabot Flavours
  - Alphabot Version 1
  - Alphabot Version 2
- 3 Components on Alphabot
  - Sensors
  - Actuators
  - Control
  - Power
  - Communication
  - Indicating Devices

# Major Components of Robot

What are the Major Components needed for designing a Robot?

# Major Components of Robot

What are the Major Components needed for designing a Robot?

- 1 Sensors: For sensing the environments

# Major Components of Robot

What are the Major Components needed for designing a Robot?

- 1 Sensors: For sensing the environments
- 2 Actuators: For movement of robots and its parts

# Major Components of Robot

What are the Major Components needed for designing a Robot?

- 1 Sensors: For sensing the environments
- 2 Actuators: For movement of robots and its parts
- 3 Control: Controller/Processor as brain of Robot

# Major Components of Robot

What are the Major Components needed for designing a Robot?

- 1 Sensors: For sensing the environments
- 2 Actuators: For movement of robots and its parts
- 3 Control: Controller/Processor as brain of Robot
- 4 Intelligence: User written command(s) to perform desired set of action

# Major Components of Robot

What are the Major Components needed for designing a Robot?

- 1 Sensors: For sensing the environments
- 2 Actuators: For movement of robots and its parts
- 3 Control: Controller/Processor as brain of Robot
- 4 Intelligence: User written command(s) to perform desired set of action
- 5 Power: A necessity for making a system work

# Major Components of Robot

What are the Major Components needed for designing a Robot?

- 1 Sensors: For sensing the environments
- 2 Actuators: For movement of robots and its parts
- 3 Control: Controller/Processor as brain of Robot
- 4 Intelligence: User written command(s) to perform desired set of action
- 5 Power: A necessity for making a system work
- 6 Communication: Robot can talk to another robot/PC

# Alphabot Version 1

# Alphabot Version 1

# Alphabot Version 2

# Alphabot Version 2

Alphabot 2 Pi

# Alphabot Version 2

Alphabot 2 Pi

Alphabot 2 Ar

# Sensors on Alphabot

## 1. IR Proximity Sensors

# Sensors on Alphabot

## 1. IR Proximity Sensors

- ① Transmitter: IR LED  
Receiver: Photo-Diode

# Sensors on Alphabot

## 1. IR Proximity Sensors

- 1 Transmitter: IR LED  
Receiver: Photo-Diode
- 2 Count on Alphabot: 02

# Sensors on Alphabot

## 1. IR Proximity Sensors

- 1 Transmitter: IR LED  
Receiver: Photo-Diode
- 2 Count on Alphabot: 02
- 3 Connected to IO Port Expander (PC8574)

# Sensors on Alphabot

## 2. White Line Sensors

# Sensors on Alphabot

## 2. White Line Sensors

- 1 Transmitter: IR LED  
Receiver: Photo-Transistor

# Sensors on Alphabot

## 2. White Line Sensors

- 1 Transmitter: IR LED  
Receiver: Photo-Transistor
- 2 Count on Alphabot: 01

# Sensors on Alphabot

## 2. White Line Sensors

- 1 Transmitter: IR LED  
Receiver: Photo-Transistor
- 2 Count on Alphabot: 01
- 3 Connected to external ADC (TLC2543)

## Sensors on Alphabot (cont.)

### 3. Ultrasonic Sensor

## Sensors on Alphabot (cont.)

### 3. Ultrasonic Sensor

- 1 Transmitter: Ultrasonic wave transmitter and receiver

## Sensors on Alphabot (cont.)

### 3. Ultrasonic Sensor

- 1 Transmitter: Ultrasonic wave transmitter and receiver
- 2 Count on Alphabot: 01

## Sensors on Alphabot (cont.)

### 4. Infrared TSOP Receiver

## Sensors on Alphabot (cont.)

### 4. Infrared TSOP Receiver

## Sensors on Alphabot (cont.)

### 4. Infrared TSOP Receiver

1 Receiver: Photo-Transistor

## Sensors on Alphabot (cont.)

### 4. Infrared TSOP Receiver

- 1 Receiver: Photo-Transistor
- 2 TSOP1738

## Sensors on Alphabot (cont.)

### 4. Infrared TSOP Receiver

- 1 Receiver: Photo-Transistor
- 2 TSOP1738
- 3 Count on Alphabot: 01

# Actuators

# Actuators

## N20 Micro Gear Motor

# Control Room of Robot

# Control Room of Robot

- 1 Arduino Uno board
- 2 ATMEL Manufactured AVR architecture based ATmega328P microcontroller

# How is Robot Made Intelligent

# How is Robot Made Intelligent

- 1 Language used for programming: EMBEDDED 'C'
- 2 EMBEDDED 'C' similar to C.

# Powering the Robot

# Powering the Robot

- 1 Battery Powered: 7.4V, 1100mAH, Li-ion battery

- 2 5V USB battery charging port

# Communication

# Communication

- ❶ Wired Communication: Between Robot and System

# Communication

- ✓ Wired Communication: Between Robot and System
  - ① USB;

# Communication

- ✔ Wired Communication: Between Robot and System
  - ❶ USB;
- ✔ Wireless Communication: Between Robot and System and Robot and Robot

# Communication

- ✓ Wired Communication: Between Robot and System
  - ① USB;
- ✓ Wireless Communication: Between Robot and System and Robot and Robot
  - ① Xbee and Bluetooth

# Communication

- ✔ Wired Communication: Between Robot and System
  - ❶ USB;
  
- ✔ Wireless Communication: Between Robot and System and Robot and Robot
  - ❶ Xbee and Bluetooth

- ❷ Infrared Remote
